**Subject:** LUB Petition Initial Review Group Notes from today

I just dropped them in same place. Note I didn't take notes in the beginning for update on notice research because I was talking, and I missed the last couple minutes to make my next call.

Here's what I have for action items – amend if you heard it differently:

- Put together two page briefing doc for Ed which includes work cataloged so far and high level goals/ measures to ensure notice and health risk abatement at private wells. (Was this tasked to anyone?) Doc needs to include framework of state agency formal engagement including info asks and scope of state agency POCs involved. Use this to brief Ed/ get green light before engaging more formally.
- Schedule briefing. (Was this tasked to anyone?) OECA ask, when scheduling Ed briefing, try to line up HQ participation as a measure of efficiency.
- Mat will brief Dan on same informally.

**Subject:** RE: LUB Petition Initial Review Group

All –

I dropped our notes from today's meeting in the "internal deliberative Review" folder in the Lower Umatilla Basin GWMA 1431 Petition on the ECAD sharepoint site. Notes include actions items. For example, Peter will be granting you access to this site if you don't already have it.

Thanks.
